

## Consent form for vaccination against covid-19

There is now a vaccine against covid-19 that is approved for young people. Therefore, the Public Health Agency now recommends vaccination for people born in 2005 and earlier. The vaccination protects against becoming ill with covid-19 and also reduces the spread of the disease.

In Sweden, vaccination against covid-19 is voluntary and free of charge for everyone. For the best effect, the vaccine is given twice, a few weeks apart. Vaccination of minors (under 18 years of age) requires either the consent of a guardian or that the minor is deemed mature enough to decide on vaccination autonomously. Persons born in 2005 or earlier are largely considered mature enough to make their own decision on their vaccination against covid-19.

In Sweden, vaccination against covid-19 is voluntary and free of charge for everyone. For the best effect, the vaccine is given twice, a few weeks apart. Vaccination of minors (under 18 years of age) requires either the consent of a guardian or that the minor is deemed mature enough to decide on vaccination autonomously. Persons born in 2005 or earlier are largely considered mature enough to make their own decision on their vaccination against covid-19.

Not providing consent means that your child cannot be vaccinated, unless he/she is deemed to have reached a level of maturity that allows him/her to consent to the vaccination.

A health declaration must be completed when booking a vaccination. Please fill in the health declaration together with your child.

The child must bring a valid identity document with him/her to the vaccination. If the child does not have a valid ID, a guardian must accompany him/her to the vaccination.

Yes, I consent to my/our child being vaccinated.

No, I do not want my/our child to be vaccinated.
